RE: Xcel Energy / Public Service Company Gas Pipeline Replacement Project

Hi Marlene,

It was a pleasure to finally meet you earlier this week. As we discussed, PSCo is preparing to replace an approximate three (3) mile section of its 6" Gunnison Lateral Gas Pipeline and an approximate 2,000 feet of its 4" Crested Butte Lateral Gas Pipeline.

Part of the pipelines to be replaced are located within CR-49 adjacent to the Gunnison County Airport. We will need to hard-close an approximate 2,645' of that road for three (3) weeks to get this section of the pipelines constructed. Portions are to be bored in and portions will be open trenched.

In support of this request, I have enclosed the following information;

1) Gunnison County Underground Utility Construction Permit Application.
2) Traffic Control Plans.
3) Google Image of the road section to be closed.
4) Construction Plans for this section of the pipeline replacement project.
5) Gunnison County LUC #2017-00009 Decision Letter.
6) Gunnison County "Certificate of Minor Impact" Approval letter.

PROJECT START and DURATION: We would like to start on Wednesday, July 5th and "hard-close" CR-49 and a small segment of San Juan Ave. for a Three (3) week period of time.

WORK HOURS: We request open ended work hours at all points of the job except the boring operations on the west end. The bore machine will be placed in the parking area adjacent to our gas regulation facility and due to the close proximity to residences, we will restrict that operation to an8:00 am to 6:00 pm timeframe.

We also request to work seven days a week. All of this will definitely shorten our time for this section of the project and ultimately shorten the need to close CR-49.

PEDESTRIAN TRAFFIC: We will need to restrict all traffic including pedestrian traffic through the work zone during this operation.

METHODS: We will be boring-in that certain section of pipe along San Juan Ave. and a couple of other locations along CR-49 to get the new pipe under the existing irrigation canals. The balance of the pipe will be open-cut in the road.

I-BAR ACCESS: We will at all times maintain an open passage from Hwy. 50 to the I-Bar facility as well as the Tomichi Creek Wildlife Area parking and access point.

Please have a look at this request and advise of any additional information you may need. Also, when you have the fees calculated for this permit please let me know so I can get a check cut and delivered.

Thank you for your time, consideration and support.

Sincerely,

KEN WILEY
