

## Screening Tests for Men

Check the guidelines listed here to find out about important screening tests for men. These guidelines are recommended by the U.S. Preventive Services Task Force. Keep in mind that these are guidelines only. Your doctor or nurse will personalize the timing of the screening tests you need based on many factors. Ask your doctor or nurse if you don't understand why a certain test is recommended for you.

Screening tests	18-39	40-49	50-64	65 and older
<b>Abdominal aortic aneurysm screening</b>				Get this one-time screening if you are age 65 to 75 and have ever smoked.
<b>Blood pressure test</b>	Get tested at least every 2 years if you have normal blood pressure (lower than 120/80).  Get tested once a year if you have blood pressure between 120/80 and 139/89.  Discuss treatment with your doctor or nurse if you have blood pressure 140/90 or higher.	Get tested at least every 2 years if you have normal blood pressure (lower than 120/80).
